ABOUT ME

After several years of working in advertising, in 2019 I transitioned to software development. I've worked with Vue and common Frontend stack for 3 years. Some months ago I focused more on React and I am currently learning Python as I want to deepen my knowledge in backend to become a Full Stack Developer.

I consider myself a curious, happy and driven person. Creating a comfortable and positive work environment within my team is key for me.

EXPERIENCE

- **Brickwise**

Dec 2020 - Dec 2022 (remote)
FRONTEND DEVELOPER

I took part in the frontend construction of the Brickwise App in close cooperation with the backend team. I was solely responsible for the website and a new unreleased product for a while, reporting directly to the CTO. Working in this startup environment was mostly high paced and challenging but truly rewarding.

- **AzertiumIT**

Jan 2020 - Nov 2020 (hybrid)
FRONTEND DEVELOPER

My team worked on a project for a worldwide hospitality group and was in charge of fixing the bugs found on their e-commerce. Learning directly from Senior developers made it an ideal starting point for me.

STACK AND TOOLS

Vue / Vuex / Vue Router	Git / GitHub / GitLab
JavaScript ES6	React
HTML5	TypeScript
CSS3	Zustand
Vite	Cypress
Sass	Postman
Tailwind CSS	Figma
Bootstrap	REST API
jQuery	Jira
npm	Agile principles
