

MARCO REYNA

FRONTEND DEVELOPER

STACK AND TOOLS

Vue / Vuex / Vue Router	Git / GitHub / GitLab
JavaScript ES6	React
HTML5	Postman
CSS3	npm
Vite	FlowBite
Sass	Figma
Tailwind CSS	WebFlow
Bootstrap	Jira
jQuery	Agile Methodologies
TypeScript	MailJet

EXPERIENCE

- **Brickwise**
Dec 2020 - Dec 2022 (remote)

FRONTEND DEVELOPER

I took part in the frontend construction of the Brickwise App in close cooperation with the backend team. I was solely responsible for the website and a new unreleased product for a while, reporting directly to the CTO. Working in this startup environment was mostly high paced and challenging but truly rewarding.

- **AzertiumIT**
Jan 2020 - Nov 2020 (hybrid)

FRONTEND DEVELOPER

My team worked on a project for a worldwide hospitality group and was in charge of fixing the bugs found on their e-commerce. Learning directly from Senior developers made it an ideal starting point for me.

ABOUT ME

After several years of working in advertising, in 2019 I transitioned to software development (Frontend). I've worked with Vue for 3 years and started using React recently. In the future I want to deepen my knowledge in backend to become a Full Stack Developer.

I consider myself a curious, happy and driven person. Creating a comfortable and positive work environment within my team is key for me.
